

# Online Coding Instructor

(Part-time schedule, Fully remote position)

Codecraft ® Works, LLC is an educational technology company powering an online learning approach to computer science, engineering, and cybersecurity training for students and workforce development partners.

We are seeking passionate individuals to provide learn-to-code, cybersecurity, or IT classes and online programs to kids, teens (8-18), and/or young adults (18+). All classes are taught online, so you will be working remotely and utilizing a virtual classroom environment. Class schedules vary from 1 meeting per week to 5 meetings per week, with approximately 6-8 students per class, or more if working with an adult group.

Codecraft will provide you with structured curriculum, project examples, and an online teaching platform. The primary role of a Codecraft Works Instructor is to deliver the curriculum in an engaging and inspirational way and to ultimately be responsible for student retention and parent satisfaction. All of your work, from your interactions with students and their parents or with our partners, to your classroom management and coding knowledge, will have a direct and visible impact on our customers and community. Your work matters now and helps your students build meaningful skills for their future!

## Responsibilities

- Deliver the curriculum in a fun and engaging way
- Provide regular student progress updates and/or share student project examples

- Provide feedback for curriculum improvement
- Engage with students, and parents as needed
- Positively advocate for Codecraft Works and the benefits of learning to code

### **Requirements**

- Experience with 1 or more of the coding languages we teach
- Experience leading, teaching, or mentoring kids or adults
- Newer, working and reliable computer with a modern browser, microphone headset, web camera, and reliable, high-speed internet access
- A quiet workspace free of distractions

### **Frequently Asked Questions**

- How much is my compensation?
  - You will be paid \$12-15 per hour with potential for bonuses or promotions based on student retention and parent satisfaction.
- What programming languages do instructors teach?
  - Our curriculum is quite broad-based. We are looking for instructors who can teach any of the following – Scratch, HTML/CSS, JavaScript, Python, or Java, and/or experience or understanding of web accessibility standards.
- What does a typical schedule look like?
  - The highest availability of summer classes is between 9 am – 6:30pm EST Monday – Friday, however additional classes may be available for evening and weekends.
- How many classes might I be teaching?
  - This varies greatly depending on your availability and experience, but you should anticipate between 5-10 classes per week, or more if working with our adults.
- How long will I need to teach?
  - Summer classes take place in June, July, and sometimes August. Longer term contracts may be made available after the summer session.
